NC Download modules for Anthon / Holzma / Homag / Giben saws £1500

Online service

Becoming a registered user of the online cutting service is **free**. As a registered user you may enter cutting requirements and available stock, along with certain cutting controls and submit jobs for cut planning. Subscription is the second level of membership offered to the online cutting workshop. A subscribed user will not only be able to see the required stock and percentage yield for a cutting job, but will also be able to download a PDF showing the detailed cutting plans.

Subscription costs just **£15** or **\$25** per month payable through the PayPal online payments system. Subscriptions do not automatically renew so you are only committing yourself to a single payment. In this way you will only be paying for the system in the months you need to make use of it. Alternative payment options are available for longer term subscriptions – please contact us for more information.

For further details on the online cutting service please download the PDF *Using the online service* from the download area.

Warranty

The system is warranted for a period of twelve months. During this period any update to the purchased version will be made available at no further charge (in the UK) and a hotline support service is provided to advise users in their use of SECANT. Thereafter, an extended warranty and upgrade agreement may be purchased annually for 10% of the current system price (including all additional modules). During the warranty or extended warranty period full credit will be given for the current version when upgrading to a higher version.
