

# SECANT

## Price List – 01/01/10 to 31/12/10

### Online service

Becoming a registered user of the online cutting service is **free**. As a registered user you may enter cutting requirements and available stock, along with certain cutting controls and submit jobs for cut planning. Subscription is the second level of membership offered to the online cutting workshop. A subscribed user will not only be able to see the required stock and percentage yield for a cutting job, but will also be able to download a PDF showing the detailed cutting plans.

Subscription costs just **£15** or **\$25** per month payable through the PayPal online payments system. Subscriptions do not automatically renew so you are only committing yourself to a single payment. In this way you will only be paying for the system in the months you need to make use of it. Alternative payment options are available for longer term subscriptions – please contact us for more information.

For further details on the online cutting service please download the PDF *Using the online service* from the download area.

### SECANT desktop systems

SECANT (2D) from £4100  
SECANT (1D) from £1500

The above systems are single user only. Support for the import of cutting and stock requirements, labelling, reporting, and pattern editing is included in the system as standard.

### Additional features

Anthon/Holzma/Homag/Giben download modules - £1500 ea.  
Other available download module - £1000  
QMAN module (allowing unattended automatic processing of jobs) - £2000  
Onsite training / day = £530 + travel/subsistence expenses  
WEBEX internet based training (4 hr block) = £350

### Multiple-copy pricing

Second and subsequent copies if purchased at the same time or by a client with a current maintenance agreement are supplied at 50% of the first copy price.

Network licenses: 1.25 times the corresponding multi-copy price.

Substantial discounts are offered for higher numbers of users.
